

THE WORLD OVER

CODE FOR PRINTERS EFFECTIVE

EDMONTON.—Proclamation of the printer's code setting a schedule of prices for printing work in Alberta will be made effective as from October 15, Hon. E.C. Manning, Minister of Trade and Industry, said here on Saturday. Report that the code as finally approved contained cuts of 10 per cent on originally planned price schedules. It is correct, the minister said. Prices agreed upon in recent negotiations will be effective under the code.

BRITISH FILM DEAL IS MADE

LONDON.—An agreement was announced Monday night by which control of the giant picture production Gaumont-British Picture Corp. will pass to the Associated British Cinema Corporation at a future date which was not specified.

Combined assets of the two companies will be \$24,000,000 (\$120,000,000).

John Maxwell, chairman and managing director of the Associated British Picture Corporation, said:

"In making this agreement, I have been influenced mainly by a desire to prevent Gaumont-British from passing under foreign control and this agreement assures that."

FLOOD CAUSES MORE HORROR

MANILA.—Floods intensified Monday night the horrors of a destructive typhoon that swept five provinces of the Philippine Archipelago, killing at least 310 persons, leveling houses and other structures, and causing widespread loss of life and property.

Swollen waters of streams in the central provinces of Luzon have directly north of Manila, carried bodies of men and animals interspersed with the numerous wreckage of frail houses. Trees in the lowlands were lashed with refugees who had failed to reach higher levels before the typhoon and heavy rains sent streams racing from their banks.

SITUATION IN ARGENTINE

Rains in Argentine last week came at an opportune time as crops were suffering severely. Just how extensive the rainfall was has not been ascertained at the time of writing.

The Argentine wheat belt is pretty well spread out and a general heavy precipitation was badly needed. In the Pampa, the moisture was markedly deficient and over a considerable area in the southwest the aggregate spring rainfall was only 40 to 50 per cent of the normal amount needed. Last year's drought left a marked moisture deficiency.

Last year's Argentine crop is now figured at 141 million bushels compared to 240 million bushels raised in 1934. The exportable surplus on September 26th was placed at 20,984,000 bushels.

A hill is a piece of ground with its back up.

NEW FALL GOODS

"FUTURA BLENDS" FELT HATS, each \$2.95
EASTERN CAPS, large variety of shades and patterns \$1.25 to \$1.75

VOLUME 15; NUMBER 17

REGULAR MEETING OF THE COUNCIL OF THE MUNICIPAL DISTRICT OF CARBON, 278

Ask For Gravel on Road South and East of Hesketh

ORDER SNOW FENCE

The regular monthly meeting of the Council of the Municipal District of Carbon was held in the Municipal office, Carbon, on Tuesday afternoon, October 6th, with G.H. Webber, reeve, J.R. McEwan, deputy-revee, and councillors J.J. O'Hausser, C.S. Gupin, H. Offer and H.H. Crowell present.

Messrs E.R. Peterson, M.S. Sember and H.S. Dewar made representation to the council requesting the graveling of the road leading to the south and east of Hesketh. The matter was discussed and the council finally decided to authorize the expenditure of \$120 on this road.

The secretary was instructed to order 200 feet of new snow fence from Calgary, same to be placed on some of the roadsides where snow-drafting is prevalent each winter.

A letter was received from the district superintendent of the C.P.R. asking that a bridge be constructed across the Kase Hill creek, known as W. of 19-29-25. With the council realizing that this could not be done but that the Municipality would maintain a crossing in the creek.

GARRETT NEWS

A number of the Garrett Boy Scouts under the leadership of Scoutmaster Hugh Isaac visited Carbon Saturday night.

The dance held at Webb on Friday last was a success. Johnny Craddock and his orchestra provided the music.

Mr. James O'Rourke was a Calgary visitor on Sunday.

Bob Poole moved to the A.J. MacLeod farm on Sunday where he will batch during the winter months.

CANADIAN WHEAT SUPPLIES

On the first of October wheat supplies in a statistical position in Canada totalled approximately 160 million bushels. This is about 72 million bushels less than wheat supplies in the same position a year ago.

Western country elevators held 50 million bushels of this wheat, western terminal elevators 64 million, Pacific Coast terminals over 7 million. Port William-Port Arthur terminals 955 million, eastern elevators at lake ports, on the St. Lawrence River and at the Atlantic 26 million, United States lake and seaboard ports 19 million, and the balance in transit by lake and rail.

DR. DUNBAR WRITES FRIENDS

Dr. H. G. Dunbar who recently left Carbon to reside at Smiths in the Peace River Country, has written to some of his Carbon friends, and in a letter to W.H.T. Olive he writes that Smiths is larger than Carbon and there are even elevators there. It has been estimated that approximately 1,500,000 bushels of wheat will be marketed there during the crop year. The town is 406 miles north west of Edmonton and is the hunter's paradise, there being ducks and geese in abundance, as well as moose and deer. Dr. Dunbar bought out the practice of the late Dr. Bruce, and finds the dental business flourishing.

LONG YEARS AGO

Thursday October 13, 1935

A nice musical program was presented by the Victorian Fernades last Monday night in the Farmers' Exchange Hall. The attendance was small and those who did not come missed a treat. A dance was given afterwards and was greatly enjoyed.

Sam Garrett and Jack Landeryou were visitors to Calgary the first of the week.

The village and district have a right to be proud of one citizen in the person of Edna Grier, who has been awarded a scholarship by the University of Alberta.

Quite a few cases of scarlet fever and typhoid have been reported around Three Hills and Trochu in the last few days.

DIG PIPE TRENCH FOR CARBON SKATING RINK

Mayor Garrett and councillors of the Village of Carbon have been instrumental in getting work started at the skating rink so that children and patrons will have the opportunity this winter to enjoy their favorite pastime.

It has been decided to leave the rink where it is at present and to pipe the water from the well near the creek. The work of digging a trench to lay the pipe has been underway by interested citizens and school boys for almost a week now and is practically completed. With the pipe five feet under ground, and good drainage, it is difficult should be experienced from frozen pipes.

FINAL CROP REPORT BY BANK OF MONTREAL

General.—While this year's total wheat crop in the Prairie Provinces is estimated to be less than that of last year, the lower production is partially offset by the high grade quality of the grain. The Dominion Bureau of Statistics estimate of the wheat production of the three Prairie Provinces, namely 216,000,000 bushels, is 1,500,000 bushels less than last year's yield and compares with a ten-year average of 388,195,000 bushels. The estimated average wheat yield by the Provinces are—Manitoba 12 bushels, Saskatchewan 8 bushels, Alberta 9.5 bushels. The 1936 wheat acreage in the Prairie Provinces is officially estimated at 21,522,000 acres or 1,000,000 acres more than last year. Production of coarse grain was substantially lower and winter food supplies are insufficient in a number of districts. Oats are estimated at 106,115,000 bushels, barley at 55,208,000 bushels. With the exception of a small acreage in the Peace River Country, threshing is completed. Deliveries of wheat by farmers to country elevators from August 1st to October 3rd, totalled 106,115,000 bushels compared with 101,215,000 bushels during the same period last year. In Quebec crop results generally were very good except that a small apple crop reduced by late spring frosts and that the yield of sweet corn was reduced by the corn borer. In the eastern and southwestern portions of Ontario crops of all kinds were satisfactory. In other portions of the Province yields were severely affected by drought. Winter wheat gave a minimum yield last spring; grain was unsatisfactory in yield and quality. Hay crops were light. Late root crops are promising; the yields of most kinds

ANNUAL MEETING OF BOYS AND GIRLS SWINE FEEDING CLUB HELD AT SWALLOW

Frank Ward Wins Guessing Contest on Hog Weight

GOOD CROWD

The fourth annual meeting of the Swallow boys and girls Swine Feeding Club was held on Saturday last in excellent weather. Mr. Wilson, the well-known judge of swine, placed the awards and there was a splendid attendance of members together with their parents and many others interested in this event.

Eighteen pairs of feeder hogs were shown, the first prize going to Jack Young of Swallow, with a nicely finished pair. Harold Howe took second prize, while Freddie Wulff and Cecil Page of Swallow won the prize money.

The judging competition was won by Gordon Ward of Granger, Ralph Brown of Acme was second, and Clark Tucker of Carbon, third in this competition. The judge remarked that it was surprising the number of boys who got their placings correct by their parents and many others interested in this event.

The Livestock Producers' Commission Co. of Calgary presented two special prizes to the two best pairs of hogs shown in this competition.

Much interest centered around a novelty judging competition, open to all present, to guess the weight of a pair of three pigs (a grandmother sow and her grandporker).

The exact weight of the three was 814 lbs. Frank Ward, the well-known old timer of Granger, was the winner when he guessed the weight at 813.

Mr. H.M. Young was second, and Clark Tucker third.

In all a very successful day was held, not only from the point of view of the boys themselves, but also from that of all who were present.

A couple of ball games held the crowd until almost dusk.

ORGANIZATION MEETING

The organization meeting of the Young Peoples Social Credit Group, which was to have been held last Friday, had been postponed to October 21st. On this occasion the meeting was read from Mr. Ansley, M.L.A., secretary of Alberta Social Credit League, and from Mr. E.P. Foss, president. The meeting is of great importance and all young people over 16 years of age are asked to attend.

Of fruits and of tobacco were much below average. Throughout the year the weather was generally unfavorable, although some crops were saved in the yield and quality of the grain. The end of May owing to inadequate rainfall and unusually high temperatures. While heavy rains during the early part of June provided a temporary alleviation, by the beginning of July severe drought conditions extended over a wide area. From then on the decline in crop prospects was extremely rapid. At the beginning of August crops had been permanently damaged. The area most seriously affected by the drought extends westward from south-eastern Manitoba through southern Saskatchewan to the foothills of Alberta, and in a wide area in western Saskatchewan and eastern and central Alberta. Crops were prematurely and continuing general during the first week of August. Harvesting operations were completed in recent times at a much lower cost and loss. The Alberta sugar beet yield is expected to be 200,000 tons compared with 140,000 tons last year. The sugar content is high.

DECREASE IN POPULATION OF CARBON MUNICIPALITY

According to the figures just released by the Dominion Bureau of Statistics and obtained from the Census of the Prairie Provinces, taken in June of this year, the population of the Municipal District of Carbon was 1383 in 1931, and 1302 in 1936, showing a decrease of 85 in the last five years.

OLD TIMERS DANCE AND BANQUET OCTOBER 26

Posters are out announcing the annual banquet and dance of the Carbon Old Timers' Association, which will be held this year in the Farmers' Exchange hall, Carbon, on Monday evening, October 26th, commencing at 7:00 o'clock.

Following the banquet a short program will be held, and after this old time dances will be held, with music by the Robinson Foot Hill Billies Orchestra. A very special program has been drawn featuring all the old time favorite dances, state the officials in charge.

All old timers who have lived in Alberta since December 31, 1930, are eligible to attend. Also their children 18 years of age and over.

The admission charge is 50c for each person attending the banquet, and 50c for each person attending the dance.

LETTERS TO THE EDITOR

Carbon, Alta., Oct. 14, 1935

Editor, Carbon Chronicle.

Dear Sir:

A case was related here in Carbon of a person applying to a municipality for relief. This person had been given a half-dram of gas so that he might, if occasion arose such as sickness or an urgent case, use his car to advantage.

Relief was given to him by the town of \$800 on condition that he give to the Council his license plates.

Occasionally an unprincipled person might take advantage of his relief and perhaps use part of the \$800 to run his car. Generally, and let us hope to all of necessity, would spend the money given for relief in groceries and the clothing of his family.

The question arises, have the council the right to take a man's license for a miserable payment of \$800?

It is only by creating public opinion on these matters that we can show up in their true light many that form the Councils of Municipalities.

May the time come when Social Credit will issue the Basic Dividend and give the individual his inherent right without the stigma of relief, so that food clothing and shelter can be had without any strings attached.

Yours truly,

UNFORTUNATE FARMER

SYNOPSIS OF AGREEMENT FOR LIGHT AND POWER IS PUBLISHED IN "CHRONICLE"

Two-Thirds of Proprietary Electors Must Be in Favor

READ AGREEMENT

A synopsis of the agreement between the Village of Carbon and Canadian Utilities Limited, outlining the terms of the electric light and power franchise, is published in the advertising columns of The Chronicle this week. While the synopsis does not outline the rates for power, these are on file in Mr. Alex Reid's office and may be seen on application.

On Monday, November 26, between the hours of ten in the morning and seven in the evening, November 30, a public poll will be held. The poll will be open in the Secretary's office for the purpose of taking the vote to determine whether or not the people of Carbon want the power and light service, and on the terms outlined in the agreement.

According to the ruling of the Board of Public Utilities, two-thirds of the vote polled must be in favor of the question before the by-law, authorizing the Council to sign the agreement, can be passed.

All Proprietary Electors of the Village of Carbon are urged to fully acquaint themselves with the terms of the agreement and the rates charged, so that they will understand what conditions at the end of ten years, voters will readily see that their decision is an important one and they should give the question careful consideration.

As the franchise is for a period of 20 years, with a clause stating that it may be terminated under certain conditions at the end of ten years, voters will readily see that their decision is an important one and they should give the question careful consideration.

LITTLE ITEMS OF LOCAL INTEREST

Glance over the by-law and form of agreement between the Village of Carbon and Canadian Utilities Ltd. is the light franchise which is to be submitted to a vote on November 2nd.

Frank Deason, the new service man for the Canadian Utilities Ltd. in this district, was reading meters last week on Wednesday.

A number of Carbon citizens attended the mass meeting in Drum-bell last Monday when Premier Abernethy spoke.

A birthday party was held in the Peersless mine hall last Saturday night in honor of Jimmy Hunt's eighteenth birthday. A large number of friends were present and a very enjoyable evening was spent in games and dancing.

NO PROVINCE WILL DEFAULT ON PAYMENTS

Ottawa.—While every avenue offering a hope for rehabilitation of provincial finances is that they may become independent of federal aid, is being explored, the consensus of the Dominion-provincial conference is that no province will be allowed to default. This was learned authoritatively.

Delegates labored long taking up the joint suggestion of Alberta and Saskatchewan for short term agricultural credits, and Saskatchewan's suggestion for enlargement of the assisted land settlement scheme.

Greater colonization efforts were forecast by some of the delegates at the conclusion.

Land settlement as method of unemployment relief has proven highly satisfactory in the opinion of representatives of all the provinces of Canada attending the conference.

Less than 10 per cent of the unemployed families are now being taken throughout Canada under the various "back-to-the-land" schemes, have met with failure, it was reported.

Some confidence was expressed. Suggestion from British Columbia that the Canadian National Railway should absorb the Pacific Great Eastern refused.

Another request from British Columbia for an economic commission to inquire into the treatment accorded that province as compared with others, was also turned down.

Unemployment and financial problems discussed by conference were in the chairmanship of Hon. J. E. Brownlie, premier of Alberta.

Suggestion that a commission be appointed to study reallocation of taxation fields given consideration. Agreement reached to appoint a sub-committee of the Dominion cabinet to look into the Duncan report on maritime claims and ascertain if it may be fully implemented.

Proposed marketing board discussed it was intimated that legislation bearing on this might be introduced at the forthcoming session.

The west would welcome the appointment of a commission to examine into economic and financial condition in the prairie provinces, it was learned from several western delegates. The commission the westerners had in mind would be one appointed to the Dominion session which conducted a survey into conditions in the maritime provinces.

"In view of the much uniformed criticism in the east against the west and its position, economic and financial, the appointment of a commission would be welcomed," a prominent western delegate stated.

Finds Old Base

Commander Byrd Surveys Old Camp in Antarctic Wastes

Little America, Antarctica.—Rear Admiral Richard E. Byrd returned to his "home" in these frozen wastes with members of his second Antarctic expedition and found that "it's all there."

After a three-months' cruise from Boston and an absence of about four years, the commander and his men happily surveyed the old base and at once prepared to dig in and preliminary to further exploration.

"It's all there," Admiral Byrd shouted when a landing party of three the 60-foot wireless towers of the camp intact and the buildings covered with snow.

The flagship lay within the glistering barrier walls of the Bay of Whales.

Would Not Change Matters

Washington.—Replying to a speech by Senator J. Hamilton Lewis, Democrat from Illinois, that the St. Lawrence treaty would give Great Britain a "military avenue through the United States," Senator Arthur Vandenberg, Michigan Republican, told the United States senate, Britain and Canada have every navigation right on the Great Lakes now that they would have under the new pact.

Endorse World Peace

Edmonton.—Endorsing every action assuring world peace, the United Front Women of Alberta convention held called Hon. Charles Stewart, chairman of the disarmament committee at Geneva, commending him for his work and urging continuation of all endeavors to prevent war.

W. N. U. 2030

Trappers Are On Rations

Winter Trails To North Inexpedient And Supplies Are Delayed

Prince Albert, Sask.—Northern trappers and traders are on rations as overland freighters, hauled by unprecedented difficulties of travel, are a month and a half late in arriving. Lac La Ronge and other trading centres.

Heavy falls of snow which came before frosts had provided a solid covering for northern muskies have rendered heavier travel virtually impossible. Horses, floundering about in the slush, and men and hikers, wet to their waists have battled through only to the north end of Montreal lake, slightly more than half the distance to the principal northern port.

Frost frosts harden the broken trail, but there still remains 70 miles, mostly over muskies, to be broken.

Flour and sugar are becoming a rarity in many northern camps and trading posts were out of many of the staple commodities until aeroplane, pressed into service in emergency, have commenced to bring relief.

Earthquake Takes Heavy Toll

Report From India States 2,000 Killed

Calcutta.—Reports of damage and loss of life far beyond original estimates flowed into Calcutta from all parts of India shortly after violent earthquakes on January 15. These unconfirmed reports indicated an estimate of 2,000 dead would not be excessive.

Known dead stood at 1,122 as officials have further word from the area, particularly from Murapur, Jamalpur, Patna, Bezwala and Bankura.

Reports were also reported killed in Munafpur. Despatches said the streets were littered with corpses.

Relief was being speeded to cities of United Kingdom. Heavily damaged. Tents and provisions were despatched to Jamalpur where 700 were killed and 150 buildings destroyed. The population in the Patna district, fearing further shocks, was living in the open. In that region 50 were killed. Mild shocks continued but were nothing in comparison to the first one which rocked all India.

The expert was said to have had conferences with Bank of England officials and to have arrived at an understanding about methods by which London and Washington would be kept informed of each other's policy. No formal financial proposals or deemed necessary, but the basis of the understanding was believed to be to let market traders take their course, with exchange equalization funds used to iron out fluctuations in currencies.

Highest authorities meanwhile gave assurance that rumors of an Anglo-American currency war as the result of President Roosevelt's refusal were without foundation. Officials of the treasury and Bank of England were silent on the matter.

Will Eliminate Competition

Provinces Agree To Hold Fishing Seasons At Different Times

Winnipeg.—Agreements for elimination of competitive fishing seasons in the lakes of Ontario, Manitoba, Saskatchewan and Alberta were recently arrived at at the inter-provincial fisheries conference called by Hon. J. S. McDiarmid, minister of natural resources for Manitoba.

Instead of fishing seasons of the different provinces being held simultaneously, it was agreed they should be held as far as possible at different times so wasteful flooding of the market would be eliminated.

Cruising In Lifeboat

Norwegian Making Second Atlantic Crossing In Frail Craft

Halifax.—Somewhere in mid-Atlantic a frail little ship of a boat is plowing lonely between Africa and South America. Aboard is Alf Hansen, with his dog and cat. The navigator is heading for Rio de Janeiro from Sierra Leon, in Africa. A postcard to a friend here brought word of the United venture. Their craft is a lifeboat decked over and equipped with sails. In it the strange trio has already crossed the Atlantic once—on a Norwegian native Norway to North America.

No Currency War Between U.S. and Britain

London.—A secret mission to London recently by a member of President Roosevelt's "brain trust" was reported here as the basis of an informal currency agreement which may hold the pound around a \$3 ratio.

Americans in close touch with official circles in London heard reports that a monetary expert of the United States government had been seen after the resignation of Oliver M. W. Sprague as financial executive assistant to the secretary of the treasury on November 21.

The expert was said to have had conferences with Bank of England officials and to have arrived at an understanding about methods by which London and Washington would be kept informed of each other's policy. No formal financial proposals or deemed necessary, but the basis of the understanding was believed to be to let market traders take their course, with exchange equalization funds used to iron out fluctuations in currencies.

OPENS CAMPAIGN

One Manufacturer In Toronto Says Demands Are Reasonable

Toronto.—More than 2,000 garment workers went on strike here, completely paralyzing the industry, with demands for higher wages and shorter hours which at least one manufacturer conceded were reasonable. But he said employers were unable to do anything without government intervention.

"The garment industry," declared S. Davies of the Davies Calk Co., "needs someone like Roosevelt to step in with his NIRA, take control, put a stop to cut-throat competition, stipulate maximum working hours and see that the workers get a decent wage."

"The situation is so widespread that government intervention is the only thing that will be any use," he said. "All the charges that workers make are true."

Prime Minister Ramsay MacDonald has opened a speaking campaign to explain the aims of the National government to electors of the country. He will speak at Leeds this week.

Aviator's Strange Experience

Encountered Weather So Warm Grate Melted On Plane

Edmonton.—More example of the almost unbelievable flying conditions pilots of the far north country must endure is cited by Pilot W. Leigh Brimbleton, president of Mackenzie Air Services, on return to the city after two flights into the Nahanni river country, north-west of Fort Simpson. On his second flight into the country, carrying a party of mining engineers, Brimbleton took off from Simpson in winter nearly 70 below zero.

As the flight progressed into the mysterious Nahanni, land of the supposed "tropical" valleys, he flew into a "Cairn," a warm current which apparently swept in over the governing winds some part of the Japan current. Within a short time the air was so warm that heavy grease, plastered on the shock-absorbing springs of his old-fashioned landing gear, melted and ran down the undercarriage.

The boy will bear the name of Bryan Denis Lutz, and will be brought up in the religion of his foster parents, who are Protestants.

As to the charge that loan guarantees and advances made by the federal government to the western provinces would not be repaid, the western spokesmen cited facts and figures to prove the contrary. Given dollar without more, one westerner said, on three items of revenue—land, oil and timber—revenue alone the prairie provinces could balance their budgets and meet the interest on the last shipment.

Another thing often forgotten, the conference has been told, was that the western provinces for years had provided the biggest share of immigrants by the federal government. Now 65 per cent of the population in relief were people who had come to Canada within the past five years.

An analysis of the distribution of the Dominion governments expenditures on public works is believed to have been presented to show that the west got less than its equitable share on the basis of population. Figures on federal subsidies were cited with the same end in view.

Presented at the session, it was understood, included Premier J. O. Patterson of British Columbia, Premier J. E. Brownlie of Alberta and Hon. M. A. Macpherson, attorney-general and treasurer of Saskatchewan.

Garment Workers Strike

One Manufacturer In Toronto Says Demands Are Reasonable

Toronto.—More than 2,000 garment workers went on strike here, completely paralyzing the industry, with demands for higher wages and shorter hours which at least one manufacturer conceded were reasonable. But he said employers were unable to do anything without government intervention.

"The garment industry," declared S. Davies of the Davies Calk Co., "needs someone like Roosevelt to step in with his NIRA, take control, put a stop to cut-throat competition, stipulate maximum working hours and see that the workers get a decent wage."

"The situation is so widespread that government intervention is the only thing that will be any use," he said. "All the charges that workers make are true."

Prime Minister Ramsay MacDonald has opened a speaking campaign to explain the aims of the National government to electors of the country. He will speak at Leeds this week.

Food Grain Is Mixed

Seed Quality Being Used In Saskatchewan Drought Areas

Saskatoon.—Seed grain used in the areas of Saskatchewan that have had early frosts and is now warmer and mixed than at any time in the history of the province, F. W. Townley-Smith, president of the Saskatchewan branch of the Canadian Seed Growers' association, warned members of the provincial body in conference.

A special committee of the association is working on a plan to aid the grower of registered seed to sell his product, he announced.

Mr. Milliken, K.C., Regina, secretary of national marketing organization, was asking for Dominion legislation for an agricultural products marketing act, explained the basis of their demands. The Dominion government is being asked to provide legislation which will enable provincial legislation to be passed upon request of an organized marketing organization, providing such an organization the right to deduct money from produce handled and sold with an easy to carry on the business of the association, and the right to prevent exports from the province through other trade channels. The right to prevent such exports, however, is also being asked, but regulations here would be with the Dominion government.

Mr. Milliken is not satisfied that these requests were distinct from the demands of the wheat pools, which were asking for an export board to act for the term of the world wheat agreement.

He explained that if the Dominion government granted the marketing act, no provincial act could come into force in the province requiring that all producers must market any given commodity, but it could come into effect, unless a large majority of the producers of that commodity showed by vote that they were in favor of such legislation.

Dean A. M. Shaw discussed alternatives for marketing grain, the possibility of the wheat agreement, but stressed that climate was the deciding factor in production, and that huge areas of the west were not growing anything else but grain economically.

"I am inclined," said Dean Shaw, "to the belief that the northwest is not suitable for anything but grain, and that the application of grain production, rather in the direction of a change in the method of production and marketing is order. It is a trade of agricultural products suitable for export may be developed."

Districts where grass could be grown plentifully were the only ones where livestock enterprises could be undertaken with any degree of success, said Dean Shaw. The problem of the prairies was to find livestock, but the west would not be able to produce quality ranges of sheep, as little pasture and hay and get along in some districts, on a minimum of water.

Poultry headed the list, in the opinion, and this was followed with common beef cattle with a few hogs as a by-product for skin-milk. Sheep the least placed at the bottom of the list.

As to the charge that loan guarantees and advances made by the federal government to the western provinces would not be repaid, the western spokesmen cited facts and figures to prove the contrary. Given dollar without more, one westerner said, on three items of revenue—land, oil and timber—revenue alone the prairie provinces could balance their budgets and meet the interest on the last shipment.

Another thing often forgotten, the conference has been told, was that the western provinces for years had provided the biggest share of immigrants by the federal government. Now 65 per cent of the population in relief were people who had come to Canada within the past five years.

An analysis of the distribution of the Dominion governments expenditures on public works is believed to have been presented to show that the west got less than its equitable share on the basis of population. Figures on federal subsidies were cited with the same end in view.

Presented at the session, it was understood, included Premier J. O. Patterson of British Columbia, Premier J. E. Brownlie of Alberta and Hon. M. A. Macpherson, attorney-general and treasurer of Saskatchewan.

The expert was said to have had conferences with Bank of England officials and to have arrived at an understanding about methods by which London and Washington would be kept informed of each other's policy. No formal financial proposals or deemed necessary, but the basis of the understanding was believed to be to let market traders take their course, with exchange equalization funds used to iron out fluctuations in currencies.

Highest authorities meanwhile gave assurance that rumors of an Anglo-American currency war as the result of President Roosevelt's refusal were without foundation. Officials of the treasury and Bank of England were silent on the matter.

EXPLAIN PLAN FOR A PRODUCE MARKETING ACT

Missus Jany.—Strong delegations from producer organizations in all four western provinces combined to make the annual meeting of the Western Canadian Livestock Union the most representative of recent years. The Manitoba delegation was headed by Hon. D. MacKinnon, minister of agriculture, and the Alberta delegation by H. A. Craig, deputy minister of agriculture.

R. H. Milliken, K.C., Regina, secretary of national marketing organization, was asking for Dominion legislation for an agricultural products marketing act, explained the basis of their demands. The Dominion government is being asked to provide legislation which will enable provincial legislation to be passed upon request of an organized marketing organization, providing such an organization the right to deduct money from produce handled and sold with an easy to carry on the business of the association, and the right to prevent exports from the province through other trade channels.

The right to prevent such exports, however, is also being asked, but regulations here would be with the Dominion government.

ANOTHER ANGLE OF THE DEBT QUESTION

The following letter in the Edmonton Journal indicates that though debt legislation may be beneficial to many it also has its sad casualties.

To my mind the most distressing equality in connection with the cancellation of debt act is the class of retired farmers, for the great majority of them will be ruined by this new legislation.

"It is this class of old settlers and pioneers who have made Alberta. These old farmers, now too old to work, who have sold their farms under agreements of sale, or who have received the cash for their land and have re-invested their loan capital in farm mortgages; a logical thing for old farmers to do for this kind of investment is the only thing they know some thing about. After all, it is no crime to own a mortgage.

"Permit me to give you just two concrete examples to show how this new debt cancellation act affects me: naturally I can mention no names.

"Number One is a well-to-do farmer of the Morinville district, who owes \$1500 on a mortgage and who also owes \$150 at the bank. This man has no further debt except some taxes. He has a half section of good land, good farm buildings, a tractor, threshing machine and other farm implements free of debt. He has always paid his interest on my mortgage with the exception of \$50 but not. Now, according to the terms of this new law I must refund to this man or credit to him on my mortgage, all interest paid by him since this summer of 1935. I must refund to this man paid \$450. Interest which this man paid willingly, never expected to get back, and which he does not need, and which I need ten times worse than he does."

Number Two is also a well-to-do

farmer at Morinville, with a half-section of land he has good farm buildings and the same part of farm machinery as Number One and same are all paid for. This man owes me \$1,650 on a mortgage and he has no other debts excepting perhaps a few taxes. The same computation applies in respect of this interest as in Number One and the net refund would be \$150 after deducting \$50 arrears in interest."

"Both farmers are more prosperous than I am; they are running high-priced cars while I did not take my car out of the garage this year as I could not stand the expense.

"But this is not all. What is left of my capital, after these deductions, is dribbled out for ten years without interest. In fact, I am not to receive any money at all until November 15, 1957. How am I going to live with my family in the meantime? My credit is ruined at the bank, for to own a mortgage now is a liability and not an asset.

"Are we perhaps some of the 'big shots' about whom we have heard so much on the political platforms and over the radio? Are we taking any money out of Alberta, or are we providing our income right here in this province?"

"This obvious injustice could be remedied if the government would amend the settlement and cancellation of debt act to the effect that every bona fide retired farmer living in and spending his income within the province, would be exempt from the provisions of the act up to five per cent per annum of his capital, so that we would be on the same basis as the boards. And of course the obvious retroactive clause in the act, which I believe I have shown to be very unjust would be modified."

VILLAGE OF CARBON

BY-LAW No. 49

WHEREAS the Council of the Village of Carbon, in the Province of Alberta, has agreed to enter into a contract with Canadian Utilities Limited to provide the residents of the Village of Carbon with a supply of electric light and electric power and to confer a special franchise upon Canadian Utilities Limited for a period of twenty years.

NOW THEREFORE the Council of the Village of Carbon enacts as follows:

1. The Village of Carbon hereby grants to Canadian Utilities Limited, its successors and assigns, a special franchise in respect of the subject matter of the contract in the form which is hereto annexed as Schedule "A", for the period or periods together with all the rights, powers and privileges, and subject to all the terms, conditions, provisions, restrictions and penalties as therein set out and contained.

2. Before the final passing of this By-Law, it shall be submitted to the Proprietary Electors, and shall only become effective upon ratification by two-thirds of the Proprietary Electors voting thereon.

3. The Mayor and Secretary-Treasurer are authorized and empowered upon the ratification of this By-Law by the Proprietary Electors as aforesaid to sign and execute on behalf of the Village a contract with Canadian Utilities Limited in the form annexed as Schedule "A".

Introduced and read the first time in Council this 20th day of June A.D. 1936.

Read the second time in Council this 5th day of October A.D. 1936.

Read the third time and finally passed in Council this A.D. 1936.

Mayor.

Secretary-Treasurer.

Attested.

Secretary-Treasurer.

SYNOPSIS OF AGREEMENT FOR RENEWAL OF FRANCHISE BETWEEN THE VILLAGE OF CARBON AND CANADIAN UTILITIES LIMITED

1. Clause 1 grants to the Company a Special Franchise, together with the right to construct, maintain and operate within the Village any structures for the purpose of conducting electricity.

The franchise is for 10 years and unless written notice is given to the Company three months before the expiration of that period, it continues in full force for another 10-year period.

2. In Clause 2 the Company agrees to construct its poles and wires in lanes, in preference to streets, when reasonably convenient, and to submit its location plans to the Council. It agrees to remove its poles and wires on the termination of the franchise.

3. Clause 3 gives the Village the right to use the Company's poles for municipal purposes. The Village agrees to indemnify the Company against loss resulting from such use.

4. The Company agrees in Clause 4 to take reasonable precautions to prevent injuries to persons during the progress of work in streets and lanes, and agrees to indemnify the Village against loss sustained by it as a result of such work.

5. The Village agrees in Clause 5 to purchase all light and power for municipal purposes from the Company. Clause 6 defines the rates, copies of which are on file at the Village Secretary-Treasurer's office, and may be seen upon request.

7. The Company under Clause 7 has the right after 48 hours' notice to disconnect the service to any customer whose account is unpaid for more than 30 days.

8. Under Clause 8, the Company agrees to supply meters without rent, and to submit a consumer's meter to test by the Department of Trade and Commerce of Canada on the request of the consumer.

9. The Company agrees in Clause 9 to keep its transmission line in good condition and to supply electric light and power service subject to interruption by accidents beyond the control of the Company.

10. Clause 10 obligates the Company to liability at law for injuries sustained or suffered by any person or property caused by any act or

omission of the Company or its employees.

11. Clause 11 gives the Village the privilege of terminating this agreement with the consent of the Board of Public Utility Commissioners upon three months' notice should the Company fail to implement and comply with all the terms and conditions.

12. Clause 12 provides that the Company shall have the rights and be subject to the liabilities created by the Water, Gas, Electric and Telephone Companies Act.

13. Clause 13 provides that the Company's rights shall not be enforceable against His Majesty in right of the Province.

14. The Company agrees by Clause 11 to submit to the jurisdiction of the Board of Public Utility Commissioners.

15. Clause 15 is the customary clause making the agreement binding on the successors of the parties.

16. Clause 16 provides that the existing agreement between the Village and the Union Power Company, Limited, dated July 1926, shall be cancelled.

NOTICE

Public notice is hereby given to the Proprietary Electors of the Village of Carbon that the above is a true synopsis of a proposed by-law which has been introduced and which will be finally passed by the Council of the Village of Carbon within four weeks from the assent of the Proprietary Electors thereto.

Notice is hereby given that the meeting of the Proprietary Electors thereon will be taken on Monday, the 2nd day of November A.D. 1936 at a poll station in the Secretary-Treasurer's office, Carbon, and the said poll will be open for such purpose between the hours of 10 o'clock in the forenoon and 7 o'clock in the afternoon.

Dated this 8th day of October, 1936.
(Signed): ALEX REID,
Returning Officer

Moss—Say, did you hear what happened to Jones?

Doez—No, sah, I didn't.

Moss—He had quite some accident, Yessuh, he fell into a barrel of turpentine.

Doez—Is dat a fact? Was he hurt?

Moss—Dunno, Dey haven't caught him yet.

Pools and the Marketing of Grain

The country elevators use the present marketing system because experience and numerous investigations have proved it to be the best and cheapest way of handling and marketing Canada's wheat.

The Western Pools, who are members of the Winnipeg Grain Exchange, state that they use its facilities because they have no other alternative. They have other alternatives. They could:

- (a) Sell direct to Canadian exporters;
- (b) Sell direct to overseas millers;
- (c) Sell direct to overseas importers;
- (d) Establish their own Pool Exchange.

They do none of these things, because they know that the open market, of all systems tried to date, affords the farmer the best price and the best protection. In other words, they use their memberships in the Winnipeg Grain Exchange in the same manner as the other country elevator companies use theirs, and for exactly the same reasons.

It may be that some better system can and will be evolved by conference, investigation or experiment. If any other system of marketing which will prove of greater benefit to the farmer can be evolved, it will receive its earliest and strongest support from the elevator companies whose price it is to have been in the vanguard of service to the farmers of the West for more than thirty years.

The North-West Grain Dealers' Association
WESTERN GRAIN DEALERS' ASSOCIATION

"Somebody to see you!"

IF EVERYBODY with something to interest you should come and ring you bell, what a nuisance it would be. Think of the awaring, jostling crowd, the stamping of feet on your parson and carpet!

Every week we know of many callers who come to see you. They never jangle the bell—they don't take up your whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in your newspaper.

In this way you have only to listen to those you know at a glance have something that interests you. They make it short, too, so you can gather quickly just what you want to know. You can receive 300 calls in 10 minutes without delay or confusion in a very few minutes.

In fairness to yourself look over all the advertisements. The smallest and the largest—you never can be sure which one will tell something you really want to know.

YES SIR!

WE APPRECIATE THEM

THE OTHER DAY WE ASKED A MAN FOR HIS PRINTING AND HE TOLD US:

"OH, OUR PRINTING DOESN'T AMOUNT TO MUCH. ALL WE HAVE IS A FEW SMALL ORDERS, AND NONE OF THEM EVER RUN INTO ANYTHING THAT LOOKS LIKE MONEY."

THOSE LITTLE ORDERS ARE THE KIND THAT MAKE OUR BUSINESS.

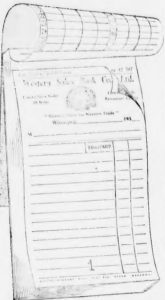

MOST OF OUR BUSINESS IS IN PRINTING LETTERHEADS, ENVELOPES, CIRCULARS, POSTERS, OFFICE FORMS, AND OTHER SMALL ORDERS.

WE APPRECIATE A SMALL ORDER AS WELL AS WE DO A BIG ONE.

SO, IF YOU HAVE ANY SMALL ORDERS FOR PRINTING, WE WANT YOU TO KNOW THAT WE ARE GLAD TO GET THEM. WE APPRECIATE THEM JUST AS MUCH—AND TAKE JUST AS GOOD CARE OF THEM—AS IF THEY ACTUALLY AMOUNTED TO HUNDREDS OF DOLLARS.

HUNTING BIG GAMEWith the opening of the big game
season, ranchers near the mountains
enter on their usual period of anxiety.
There are some very inexperienced
and careless hunters go in to the hills
and instances of what is done in the
zeal for game would be amusing, if
they were not serious either in fact or
in possibility.The law requires that the only area
where hunters can pursue the chase is
in the forest reserve, and any en-
croachment on ranch property or leas-
ed land must be through permission of
the owner or holder. This year cattle
are being left up in the hills as late as
possible and care with the trigger fire
is advised, because a cow and a deer
may look alike to an excited hunter. In
fact the story is told of two sports-
men "shooting it out" across a valley,
each thinking the other a deer. They
lived to find out their error. The ping
of a rifle shot near ranch buildings is
not unknown.Courtesy on the part of the hunters
whether in the foothills or the farms
will as a rule bring courteous re-
sponse. It is the inconsiderate
thoughtless sportsman who not only
brings himself into disrepute but pen-
alizes a vast number of others.

WHERE DO YOU STAND

Whether he wishes to or not, the
present is a challenge to a man's
right to rule in business. Also it is an
opportunity. With men on every hand
old times as well as new, vacillating
under the stress of mixed emotions,subject to fears of the wilderness
ahead, there is an opportunity for the
courage, the far-seeing, the man with
sound judgment and a definite ambi-
tion, to take advantage of the present
conditions and gain a long march on
his contemporaries. It is being done.
New leaders in men and business con-
cerns are in the making. Old concerns
that have adopted a stand-pat policy
that are awaiting full recovery before
they shall strive for business, are like
ly when the time comes, to find others
in the field so soundly entrenched as
to make the doing of business by the
stand-patters are doubly difficult.So the new names in advertising
columns. See the new selling organi-
zations that have suddenly sprung up
tuned to a high pitch of enthusiasm,
and covering every nook and corner
of the country under an aggressive
sales policy that is making itself
felt everywhere. They are not only
business new, in the present, but they
are securing to themselves a position
for the future that will make it hard
indeed for the older competitors who
have lain low, to come back.A man can well afford to pause and
ask himself, "Where will my business
be next year and five years hence?"
The answer is to be found in his own
mind. Material things originate first
in the mind. A house and automobile
are conceived in the mind before they
are built in fact. The same is true of
business. Such practical things as or-
ders, volume, profits, are the result of
mental activities before physical.The mind beset by fears, concerned
only with hazards of the times that
refuses to risk in the interests of gain,
cannot, by any reasonable rule of
business as of life, hope to achieve
that which is the goal of every busi-
ness. Think twice before you decide
to continue to "lay low" with your
business.

Policyholders Own the "Assets"

of Life Insurance Companies

As a great co-operative enterprise, Life In-
surance has built up Assets in Canada
totalling, approximately, two billion dollars.
Yet these Assets are relatively small when
it is realized that they are jointly owned by
about 3,500,000 policyholders—one-third of
Canada's population.

On the average, each policyholder owns
\$571 as his share of the total Assets in Life
Companies operating in Canada. Obviously,
the great majority of policyholders are men
and women of ordinary means—thrifty
people who, year by year, have entrusted to
Life Insurance part of their savings so that
they may have financial security against the
uncertain future.

These policyholders represent the best
type of Canadian citizens. They have sought
to preserve their financial independence, and

as thrifty citizens, neither they nor their
dependants are ever likely to become charges
upon government or municipal relief.

To protect the interests of these 3,500,000
Canadian policyholders, Life Insurance Com-
panies have invested their Assets in govern-
ment and municipal bonds—in first mor-
gages—in public utilities and industrial en-
terprises—and in other authorized securities.

The soundness of the Investment policy of
the Companies has been tried and proven
during periods of severe financial stress.
Governing and corporate bodies in which
policyholders' monies are invested have, until
recently, maintained the integrity of their
obligations. This has made it possible in
turn for the companies, in their capacity as
trustees for the policyholders, to fulfill every
obligation guaranteed by their policies.

Now, however, there is a growing tendency to repudiate, by legis-
lation, public and private debts, regardless of the debtor's ability
to pay. Legislation which tends to destroy the ownership of public
and private property places an unjust burden upon life insurance
policyholders.
